To Pemberville Council and Zoning Committee:

I am writing in regards to the zoning of the field to the north of Front Street. I have major concerns with the rezoning of the property at this time. After walking through the neighborhood and discussing issues with neighbors, I am confident that Sherman Avenue and Sycamore Street are not capable of handling the amount of traffic that is proposed to be forced on these streets. These streets are merely paved alleys with low levels of traffic. Widening the streets will cause some residents to lose their off-street parking and also take away the ability for them to even park in front of their garages. The houses on these streets are very close and widening the streets will not be sufficient for the traffic of 40-45 new homes. I urge the council to look at these streets carefully before passing the re-zoning. Additional inlets and outlets should be created prior to any plans for this property.

I understand that some believe Pemberville needs to grow, but I don't believe it should be at the sacrifice of existing residents. This neighborhood is where we live. The traffic on these streets will impact our lives every single day. I am very concerned about the changes it will cause to our existing neighborhood.

Sincerely,
